MOTION

We MOVE to repeal the Parking Modernization lease approved by City Council.

We further MOVE to direct Administration to attempt to negotiate a more favorable deal for the City with the Port Authority, or develop an internal plan for parking modernization, that includes ending parking enforcement hours at 6 pm.

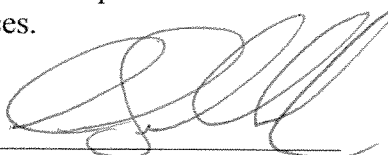

We further MOVE to direct Administration to develop a budget deficit reduction plan that does not include using upfront parking funds to offset future budget deficits.

STATEMENT

The parking modernization lease approved by City Council includes enforcement hours through 9 pm, a provision council, citizens and business groups believe may harm business districts throughout the city.

Administration plans to use upfront parking proceeds to offset current and future budget deficits is unwise, and Council requests a solid budget deficit reduction plan that includes analysis and benchmarking and does not rely on one-time upfront sources.
